

## アジア・オセアニア高校生フォーラム 夏休み課題 優秀作品 紹介②

前回に引き続き、1・2年生夏休み課題、「世界との対話と協働：アジア・オセアニア高校生フォーラム」の動画視聴及び要約・感想の優秀作品の感想を紹介します。

### 教 育 問 題

2年2組 黒田 理友

I wanted everyone to be equal so that children all over the world could receive a good education. We donate postcards that have not been mailed because they were misaddressed or too old to be sent, so that poor children can go to school. Thanks to this, UNICEF 2018 will enable

1,345,000 people to get an education and build 535 temple schools. That's what I learned for the first time.

I decided to find out if there was anything I could do.

### 環 境 問 題

2年2組 宮井 沙也奈

Like her classmates, I knew nothing about veganism. I'm more familiar with the word global warming, but I didn't know specifically what we should do to prevent global warming. One of them is veganism, which I am not very much in favor of. Certainly, I think that it is an advantage that it is environmentally friendly and leads to the prevention of harmful substance discharge to the earth. However, at the same time, I also find it difficult not to consume all the services that involve animal cruelty. I think that it is not a good life not to eat beef, pork, chicken, etc.. That's why I wanted to contribute to the prevention of global warming in other ways, such as saving and recycling.

### 津 波 ・ 防 災 対 策

2年5組 石丸 咲月

I had never thought about measures to protect foreigners from Japanese disasters. Because it is a disaster in Japan, I was only thinking about Japanese people. However, since internationalization is progressing now, I often see foreigners in Japan. There is a possibility that a disaster will occur while they are in Japan. So, I realized that it is important for Japanese people to help them take measures. In the presentation, three things were important. Among them, I thought "evacuation drill" was the most important thing. Evacuation drills are training when there is a disaster, so you can learn what to do when you really have a disaster. If foreigners participate, they can learn by themselves. Besides, I thought it was a very good way to hear various things from the locals by doing evacuation drills. I think foreigners will continue to come to Japan in the future. It does not necessarily mean that there will be no disaster at that time. So I thought it was important for everyone to learn about disasters regardless of the country.
